Jean Pierre Malet is a French scientist who has managed to unite science and spirituality in his amazing discovery on the doubling of time.

Everyone, even the most sceptical ones, was at least once in a lifetime looking for answers that accompany him/ her throughout existence: who we are, what are we doing on our planet, what is the purpose of life ... Some think that there doesn't exist anything more than the strictly tangible, that we are a fruit of a malevolent fate giving luck to everyone. Somebody believes that God just observes the destruction of our world and imposes obsolete dogmas that prevent us from realizing his real essence and power. Others, however, intuitively know that

life is magical, that there is something more behind this apparent chaos that surrounds us. For them nothing is just a coincidence, they are looking

“Past, present and future are simultaneous realities that run at different speeds”

passionately for answers; sometimes they have to face disappointment and disenchantment or are led astray, but there is nothing that

could stop them in taking on this challenge. And one day they discover that the Universe is a grand and sublime symphony in which each of us plays unique and essential notes. And in this moment, faith opens the way to certainty.

Jean Pierre Garnier Malet, awarded physicist and specialist in “Mechanics of Fluids”, presents us, through his fascinating “Doubling Theory of Space and Time” that has allowed him to explain the arrival of planetoids into our Solar System with extraordinary precision, a new way to understand life and the Universe.

In 2006, the prestigious journal “American Institute of Physics of New York” and its Scientific Committee awarded his “Doubling Theory of Space and Time” with “The Best Paper Award”.

Garnier, from a scientific point of view, reveals in this interview a secret that has been hidden for over 2000 years.

Mr. Garnier, explain the term “doubling of time” and how its discovery implicates human beings? Like the time, every human being doubles, this is a principle as vital as eating or breathing. In order to exist we live in various times at once. Between two perceptible moments there is always an imperceptible one. That is, in a time span that we are able to observe consciously, there exists one second, but other thousands of seconds exist in a time that we are not aware of. Time is not continuous, but people do not understand it.

How is it possible we are not aware of a principle that you call vital? Obviously, we realize that there are experiences that we do not understand. Over centuries, people have tried to find explanations for various phenomena. However, all my discoveries and theories were known 2000 years ago. The Greeks such as Plato and Pythagoras knew this theory very well, it can be found in the Old Testament “I am the Alpha and the Omega ... the first and the last, the beginning and the end”, or in Old Egypt “I am Yesterday and I know Tomorrow”. In the Tibetan Book of the Dead there is a passage that says: “When from the other side I will see the other Me ...”

So we have a double who lives in another space, in another time. What will its calling be? Present, what we live now, is a reflection of the

future we have created. We are continuously creating our potential future with our thoughts. Fortunately, it takes time for these futures to be realised, and before that happens, it is vital to correct the mistakes we make within these futures. It is also very important to realize that everyone can choose his or her future and therefore we have to pay attention to what we are creating. Only our double can do this, only he knows what is best for us and what our mission on Earth is.

You say that we create the future. Does this make sense within the “Law of Attraction”? It is the opposite, the “Law of Attraction”, widely practised in the Anglo world, is based on projecting or visualising of your wishes and dreams so that they come true, but this process can be very dangerous because only your double can choose the best future for you. Your “Double” explores in its space/time all potential futures and chooses the best one, if you ask for it, but it does not always reflect your wishes as human beings are “limited” in their essence. For this reason, it is important when asking for something to happen to add a formula: “if it's good for me”.

Can we say that destiny does not exist then? In the world, there is a lot of violence, people are dependent on information, they want to know what will happen next and all that kind of stuff, as if no one had any responsibility for the events of our everyday life. Everyone mentions destiny, karma, people are sure that they have no power over their future, that they can not change it. And it's not true, the future can be changed as we are the architects of our destiny and the future of our planet.

How can we contact our double? Past, present and future are simultaneous realities that run at different speeds. However, there are so called "Time Openings" that can connect the different times, they are imperceptible moments. As I said before, these openings are real and enable us to receive information from our double. But the best way to engage with our double is to contact him at night, during a deep sleep, the most essential part of life that we consider superfluous. I am speaking about a vital principle that allows us to correct our future if we spoiled it during a day. If you do not know how to use dreaming, quickly we loose our life balance. These imbalances are often causing diseases. It is essential to know how to "sleep well" to prevent the future from influencing our life.

How can we establish this communication? Everything in the world is dual. As Einstein proved, we are all wave and particle. If during our sleep we do not manage to connect with our double, we enter futures that are not meant for us, that do not suit us and can be even dangerous as we might reflect them into our present. Just in the moment before we fall asleep, it is necessary to let our double know what we are concerned about. Dalai Lama has stated that the only valid meditation is numbness.

If everything is dual, it means that the double has a physical body? Our double, like us, is wave and particle and has a physical body and its own energy. Is the exchange of energy occurring every night that allows our double to know what concerns us. He reads all the needed information from the energy of our bodies. Based on intuition and premonition he lets us know the solution to our problems. Or the problem will simply disappear.

Can we help others through our double? Do not help a person if he or she does not ask for your help, it would mean interfering with his or her future and that could bring unpleasant consequences. Furthermore, your double knows what is the best future for you, but does not know which one is the best for me, it just knows mine. It is dangerous and could result in future assumptions that do not belong to us. Only with our mother we establish a connection that goes beyond physical death. The double of a mother and the one of a child are united. Only your mother can help you and vice versa.

How is the world of our double? We can confuse the incarnation that allows us to reach the world in this "monkey skin" with a world in

which we exist in an eternal and immortal way, that is the universe of our double. He is our link with immortality and with the Creator.

Is it possible to see him physically? Only at the time of death we meet with our double, but we have to clarify that we are prisoners of our own potential, of what we have created. If, for example, we have done something bad against

"The double is our connection with immortality and with the Creator"

"The 'other Me' chooses the best future for us and it presents me with its choice"

someone we have to fix it before we die, if not the connection with our double will not happen. All generations of today's world live with potential sins and have to fix them before the end of this cycle, which is approaching very quickly. We must maintain a benevolent attitude in life. We should think of others as we would like them to think of us.

Jean Pierre Garnier Malet and his wife Lucile.

It sounds very apocalyptic. Mr. Garnier, tell me, how can we abolish those potentials?

The doubling cycle lasts 25,000 years. Formerly, to discuss the completion of a cycle, it was said "the end of all times". That has led to the fact that today we think of Revelation as the end of the world, and it is not. It is only the end for one time cycle in which it is essential to correct all disastrous potential futures we have created over centuries, this is the reason we are alive. In this way, we will connect with our double after physical death and if we do not manage to wash away all the negative things, we will incarnate to another cycle.

But how do we remove these potentials?

By asking your double. Every night you must delete the negative potentials that you have created during the day and concentrate only on the best ones. It is also important to clean all the harmful potential that we have created in the past.

Mr. Garnier, finally, what role does God play in all this?

We have a God in our double, they have actually the same appearance. The Creator and the double exist in the same reality but in different times and we exist in a completely different reality than both of them. The truth is that we have a God inside us. And that was the big mistake of religions that have separated us from our rightful heritage. Jesus Christ is an example of what I mean; he lived in three times at once.
